

ZoneAlarm®

Secure Wireless Router Z100G

with Firewall, Antivirus, Intrusion Prevention, Remote Access, Print Server, Super G, and Extended Wireless Range

The First Complete Security Solution for Home Networks

Internet security threats are more numerous and more insidious than ever. Powered by the latest programming advances, these viruses, worms, and hacker attacks demand that you fight back. But protecting your PC – and yourself – requires a host of solutions that are often costly and complicated to install. This makes ensuring secure accessibility of your home network a primary goal. What's needed is a cost-effective, reliable Internet security solution that's easy to set up and use.

The ZoneAlarm® Secure Wireless Router Z100G is the first comprehensive security solution for home networks. It combines unsurpassed security with an extended-range/super-fast wireless router and print server so you can set up a home network in just a few minutes without exposing yourself to security risks. It's a proven, solid line of defense against hacking attempts, spam attacks, phishing, viruses, and more in a user-friendly all-in-one solution.

ZoneAlarm® Secure Wireless Router Z100G minimizes dead spots with extended range (RX) technology—up to 982 ft (300 meters) indoors and 3,280 ft (1 km) outdoors. Super G technology lets you share files, photos, music, video, printer and Internet access, and network storage at super-fast speeds.

UNMATCHED PROTECTION

The ZoneAlarm Secure Wireless Router Z100G incorporates the same powerful Check Point® security technology chosen by 98% of the Fortune 500. It features a firewall, a customizable gateway antivirus solution, an integrated print server, intrusion prevention, and a high-performance, wireless, remote access point.

Check Point's fully secure solution starts with a Stateful Packet Inspection (SPI) firewall technology that dynamically filters packets of information all the way down to the most deeply embedded data high-level filters miss. By integrating Web filtering/parental controls, anti-spam, and monthly security reports with secure remote access to your network devices, the ZoneAlarm® Secure Wireless Router Z100G provides the definitive and comprehensive security solution.

FEATURES AND BENEFITS

Total Network Security

- **Unsurpassed Firewall Protection** — The industry's #1 firewall. Check Point's patented stateful packet inspection (SPI) technology dynamically filters packets of information all the way down to the most deeply embedded data that high-level filters miss. It fully protects your network against unsolicited data transfers and external Internet attacks.
- **Gateway Antivirus** — Blocks viruses before they reach your network, protecting all the PCs in it, even if they don't have the latest patches or updates installed. The antivirus policy setup provides a simple, quick way to define which data to scan.
- **Remote Access VPN** — Enables secure remote access to your home PC using Virtual Private Network (VPN) technology to encrypt communications so that data cannot be viewed or corrupted during transmission.
- **Intrusion Detection and Prevention** — Proactively monitors network traffic to stop hackers and worms, and also lets you control peer-to-peer and instant message communications.
- **Secure Wireless Communications** — Uses proven, state-of-the-art WPA2 (802.11) and IPSec encryption.

ZONEALARM SECURE WIRELESS ROUTER Z100G SPECIFICATIONS

Wireless Specifications	
Wireless Protocols	802.11b (11 Mbps) 802.11g (54 Mbps) Super-G (108 Mbps)*
Wireless Security	WEP, WPA2 (802.11), WPA-PSK (802.1x)
Wireless Range	Up to 300m (984ft) indoors and 1km (3280ft) outdoors*
Hardware Features	
Firewall Throughput (Mbps)	70
VPN Throughput (Mbps)	5
Concurrent Firewall Connections	4,000
1-Port WAN and 4-Port LAN Switch	✓
2 x USB 2.0 Port Print Server	✓
Wall Mounting Kit	✓
Anti-theft slot	✓
Firewall & Security Features	
Check Point Patented Stateful Inspection Firewall	✓
Gateway Antivirus	✓
Application Intelligence-- (IPS)	✓
Instant Messenger Blocking/Monitoring	✓
P2P File Sharing Blocking/Monitoring	✓
Reporting and Logging	✓
VPN	
Number of Remote Access Users	1
Remote Access Client Software	Check Point VPN-1® SecuRemote™ (included)
Support VPN pass-through	✓
Networking	
Internet Access Protocols	Static IP, DHCP, PPPoE, PPTP, Telstra
Concurrent Users	5
Management	
HTTP/HTTPS/SMP	✓
Add-On Services**	
Gateway Antivirus	✓
On the Fly Decompression	✓
Antispam**	✓
Web Filtering***	✓
Specifications	
Weight: 1.8 kg (3.97 lbs.)	
Physical Dimensions H x W x D (mm): 31 x 200 x 128 (in inches: 1.22 x 7.87 x 5.04)	
Warranty: 1-year warranty	
Included Support and Software Updates: 90 days	
System Requirements	
Internet:	
• Broadband or High-Speed Internet Connection with RJ-45 Ethernet Port	
Connected Devices:	
• 10/100Mbps Ethernet Network Interface Card or 802.11b/g Wireless Adapter	
• Microsoft Internet Explorer 5.0/Mozilla Firefox 1.0 or Higher	

*Super-G and XR mode only available with select wireless network adapters. Subject to change in different environments

**Requires additional purchase of services

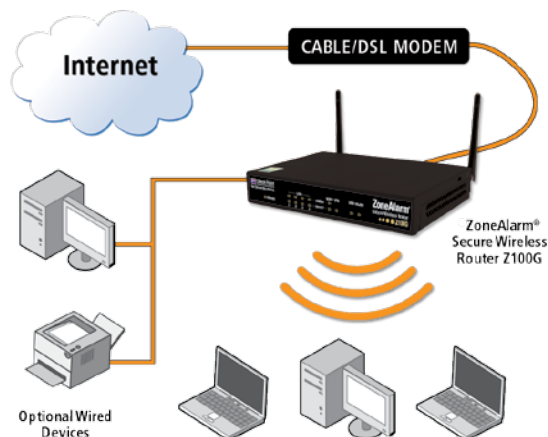

***Free basic installation support provided for 90 days from date of purchase installation. Advanced product features and configurations are not included in free basic installation support; optional premium support available.

Superior Wireless Router

- **Fast Wireless Performance** — Supports Super G standards at blazing wireless network speeds of up to 108 Mbps. Compatible with the older 802.11b and 802.11g technologies.
- **Extended Range** — Avoids dead spots in your home using dramatically extended range (XR) technology for coverage up to 300m (984 ft) indoors and 1km (3280ft) outdoors.
- **Bandwidth Management** — Employs the same technology used by Fortune 500 companies to help you make the most of your broadband connection. Built-in traffic monitoring and packet capture tools allow you to control and monitor incoming and outgoing traffic, and ensure efficient utilization of your broadband connection.
- **Built-in Print Server** — Turns any USB-enabled printer into a wireless network printer so you can print from anywhere in your home.

Convenient and Easy to Use

- **Setup Wizard** — Step-by-step instructions help you secure your home wireless network in minutes.
- **Web-Based Management** — A customized user interface with preset security rules. Select one of three pre-set firewall policies (high, medium, or low), or create your own custom security policy.
- **Monthly Security Report** — Provides information on the performance and effectiveness of security services such as blocked attacks, detected viruses, filtered websites, and more.
- **Flexible Optional Services** — Website filtering, or parental controls, helps protect your family from inappropriate or potentially dangerous content.
- **Automatic Updates** — Regular automatic software and antivirus updates keep your network protected from the latest threats.
- **Free Online Technical Support** — Available 24/7, and through our automated support agent.
